EXHIBIT 8

Preliminary Claim Chart Showing Infringement of Claim 20 of the U.S. Patent No. 7,127,210 by Uconnect

US Patent 7,127,210 Versus Chrysler Uconnect (3 and 4)

Preliminary Claim Chart Showing Infringement of Claim 20 of the U.S. Patent No. 7,127,210 by Uconnect
20. A communication apparatus comprising:

a unit configured to establish a connection with a first wireless communication apparatus in a first mode; and

a unit configured to control a connection from a second wireless communication apparatus when the connection with the first wireless communication apparatus is established, wherein the control unit sets up a second mode in which, in a state where the connection with the first wireless communication device is established, the communication apparatus is inhibited from establishing a connection with the second wireless communication apparatus with respect to a connection request from the second wireless communication device.

Mobile phone pairing is the process of establishing a wireless connection between a cellular phone and the Uconnect system. To complete the pairing process, you will need to reference your mobile phone Owner's Manual. Please visit UconnectPhone.com for complete mobile phone compatibility information. . . . 9. When the pairing process has successfully completed, the system will prompt you to choose whether or not this is your favorite phone. Selecting "Yes" will make this phone the highest priority. This phone will take precedence over other paired phones within range and will connect to the Uconnect system automatically when entering the vehicle. Only one mobile phone and/or one Bluetooth audio device can be connected to the Uconnect system at a time. If "No" is selected, simply select "Uconnect" from the mobile phone/audio device Bluetooth screen, and the Uconnect system will reconnect to the Bluetooth device.
